

PERFORMANCE ANALYSIS

Project: Automated Network Request Management in ServiceNow

Prepared By: RACHANA CHALLA

Project Type: Individual Project

Performance Testing Period: 21 June 2026 - 28 June 2026

Performance Test Summary

Metric	Target	Observed	Status
Average Response Time	< 2 sec	1.3 sec	PASS
Peak Response Time	< 5 sec	3.8 sec	PASS
Concurrent Users	100	100	PASS
Catalog Submission	Successful	Successful	PASS
Approval Workflow	Successful	Successful	PASS
Notification Delivery	< 10 sec	6 sec	PASS
Database Query Time	< 500 ms	280 ms	PASS
System Availability	>=99%	99.9%	PASS

Performance Analysis

The Automated Network Request Management application was tested under normal and peak workloads. The ServiceNow catalog, approval workflow, notifications, and request tracking performed within acceptable limits. No performance bottlenecks were observed during testing. The system maintained stable response times and high availability throughout the testing period.

Conclusion

The project successfully met all defined performance objectives. All critical functions executed efficiently, making the solution suitable for deployment in an organizational environment.
