

USER ACCEPTANCE TESTING (UAT) TEMPLATE

(Automated Network Request Management System)

Date	21 June 2025
Team ID	INDIVIDUAL PROJECT
Project Name	Automated Network Request Management System
Maximum Marks	100

PROJECT OVERVIEW

Project Name:	Automated Network Request Management System
Project Description:	A ServiceNow-based solution to automate network-related requests such as VPN access, IP allocation, firewall changes, and router configurations. The system streamlines request submission, approval workflows, provisioning, and notifications.
Project Version:	1.0
Testing Period:	21 June 2025 to 28 June 2025
Testing Scope:	- List of Features and Functionalities to be Tested - List of User Stories or Requirements to be Tested
Testing Environment:	
URL/Location:	https://dev123456.service-now.com
Credentials (if required):	RACHANA.CHALLA / ()

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit a New Network Request (VPN Access)	- Login to the Service Portal - Navigate to Network Request Catalog - Select VPN Access - Fill in all required details and submit - Verify confirmation message	Request is submitted successfully and Request ID is generated.	Request submitted successfully and Request ID generated.	Pass
TC-002	Approve Network Request (Approver Flow)	- Login as Approver - Navigate to My Approvals - Open the pending request - Review and Approve - Verify status update	Request is approved and status updated to Approved.	Request approved successfully and status updated to Approved.	Pass
TC-003	Provision IP Address (IP Allocation)	- Submit IP Allocation request - Approver approves the request - System provisions IP automatically - Verify IP is assigned and notification sent	IP address is allocated and available to the user.	IP address allocated successfully and notification sent.	Pass
TC-004	Firewall Change Request	- Submit Firewall Change request - Approver reviews and approves - Verify firewall change is implemented - Verify status update	Firewall change implemented and status updated.	Firewall change implemented successfully and status updated.	Pass
TC-005	Router Configuration Request	- Submit Router Configuration request - Approver approves the request - Verify router configuration is applied - Verify status update	Router configuration applied and status updated.	Router configuration applied successfully and status updated.	Pass

SIGN-OFF:

Tester Name: RACHANA CHALLA
Date of Test Completion: 28 June 2025
Signature: Rachana Challa

NOTES:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
