Project: **Automated Network Request Management in ServiceNow**

Define the Customer (CC)	1. CUSTOMER SEGMENT(S) Who are my customers? - Employees (Requesters) who need network access or services - Network Managers / Approvers - Network Engineers (Fulfillment team) - IT Administrators	CS	4. CUSTOMER CONSTRAINTS What constraints / pain points prevent them from getting solutions easily? - Manual request process is time consuming - Lack of visibility on request status - Delays in approvals and task assignment - Many emails and follow-ups - No standardized way to raise network requests - Errors due to manual data entry	CC	5. AVAILABLE SOLUTIONS What solutions are customers using today? - Email requests - Shared Excel/Word forms - Phone calls / Walk-ins - Manual tracking and follow-ups - Basic ServiceNow forms (non-automated)	AS	Explore the Tree Problem (RC, BE)
	2. JOBS-TO-BE-DONE / PROBLEMS What jobs are customers trying to get done? What problems do they face? - Raise a network request quickly - Get approvals without delays - Know the status of my request - Get the network service on time - Communicate and track in one place	JtBD	1. PROBLEM ROOT CAUSE Why do these problems exist? - No automated approval workflow - Lack of integration between teams - Manual task creation and assignment - Scattered communication - No real-time status updates	RC	7. BEHAVIOUR How are customers currently addressing these problems? What are their workarounds? - Sending emails to multiple people - Following up repeatedly - Manually checking with IT team - Keeping personal notes / spreadsheets - Calling or visiting the network team	BE	
Validate / Iterate the EM, SL, CH	3. TRIGGERS What triggers the customer to start looking for a solution? - Need for new network access - New employee onboarding - Access changes (role/location change) - System/Network issues - Security / Compliance requirements	TR	10. YOUR SOLUTION How does your solution help customers get the job done? - Self-service catalog to raise network requests - Automated approval workflow - Automatic task creation and assignment - Real-time status tracking - Email notifications at every stage - Centralized communication and history - Faster fulfillment and improved visibility	SL	8. CHANNELS of BEHAVIOUR Where do customers look for solutions? How do they interact with your solution? - ServiceNow Service Portal (Web) - Email Notifications - Desktop / Laptop - Internal IT communication	CH	Measure & Learn (SL, CH, EM)
	4. EMOTIONS BEFORE / AFTER How do customers feel before they solve the problem? How do they feel after the problem is solved? - Before: Frustrated, Uncertain, Delayed, Confused - After: Satisfied, Confident, Happy, Productive	EM	9. CHANNELS of SOLUTION Where will customers access your solution? - ServiceNow Service Catalog - My Requests Portal - Email Notifications
